WHAT NOT TO FLUSH

PROTECT YOUR PIPES. PROTECT YOUR COMMUNITY.

⚠ ONLY FLUSH TOILET PAPER!

Flushing the wrong items causes costly clogs, sewer backups, and environmental damage. The only thing that should ever go down your toilet—besides human waste—is toilet paper. Everything else belongs in the trash.

WIPES & HYGIENE PRODUCTS

🚫 Flushable wipes (they are NOT truly flushable), baby wipes, makeup wipes, facial tissues, cotton balls, cotton swabs, and feminine hygiene products all clog pipes and tangle sewer equipment. Dispose of all wipes and hygiene items in a waste bin—no exceptions.

FATS, OILS & GREASE (FOG)

🚫 Never pour cooking oil, grease, or fat down any drain. FOG solidifies in pipes and builds up over time, causing major blockages. Let grease cool, then scrape it into a sealed container and dispose of it in the trash or at a local drop-off site.

PAPER TOWELS, MEDICATIONS & MORE

🚫 Paper towels, napkins, dental floss, medications, hair, cat litter, cleaning products or other chemicals, diapers paper or cloth, and food scraps must NEVER be flushed. Return unused medications to a pharmacy take-back program. All other items go in the garbage—not the toilet.
